experience.

Matching the intelligence of gpt-4 turbo, it is remarkably more efficient, delivering text at twice the speed and at half the cost. Additionally, GPT-4o exhibits the highest vision performance and excels in non-English languages compared to previous OpenAI models.

gpt-4o is engineered for speed and efficiency. Its advanced ability to handle complex queries with minimal resources can translate into cost savings and performance.

The introduction of gpt-4o opens numerous possibilities for businesses in various sectors:

- Enhanced customer service:** By integrating diverse data inputs, gpt-4o enables more dynamic and comprehensive customer support interactions.
- Advanced analytics:** Leverage gpt-4o's capability to process and analyze different types of data to enhance decision-making and uncover deeper insights.
- Content innovation:** Use gpt-4o's generative capabilities to create engaging and diverse content formats, catering to a broad range of consumer preferences.

Updates

`gpt-4o-2024-11-20` : this is the latest version of gpt-4o. Supports all previous output size (16384) and features such as:
